Thank you for your interest in our rural insurance programs. We specialize in rural insurance markets for independent agents. Underwriting, policy service and claims are conducted by our office with local personnel that understand agricultural operations. We offer Farmowners/Ranchowners (FO/RO), Rural Auto, Excess, and Inland Marine/Irrigation. We use some of the strongest carriers in the business.

I established MARM to provide rural agents with a competitive, quality market for farm and ranch risks. We are not a brokerage operation but provide markets for contracted independent agencies committed to serving agri-business operations. We have coverage superior to most companies. Perhaps best of all is our ability to offer flexible, coverage perils and settlement options. Our irrigation program provides for replacement cost and M&E, regardless of age as long as it is insured to current replacement value. Our website at www.MARM.net, supports agents with our exclusive **Inland Marine and FO/RO marketing programs**, providing rating and applications, ability to download our agents manual and review other pertinent information about our products. We can PDF policies to your agency for peak policy delivery times. You can e-mail our staff, send us digital photos and submit policy change requests from the site, a real convenience for our agents. Once contracted with us you will be given a unique username and password.

Please review the enclosed material. I would be glad to discuss mutual opportunities that we might have as we are interested in writing business in your area. I have included an Agency Profile that you can fax or e-mail to me to give me more information regarding your agency. Feel free to contact me (800 935-6276 X510) to explore working together to expand your market share of agricultural insurance risks.

Best Regards,

Paul R. Friskopp, AFIS, President
